Skills

- Agile/Scrum
- Software Engineering
- Teamwork
- Full Stack JavaScript Development
- HTML5/CSS
- Java
- JavaScript
- TypeScript
- C/C++/ C#
- Python
- SQL/MySQL/Microsoft SQL Server
- PHP
- Node.js
- Visual Studio
- Visual Studio Code
- Git/GitHub
- Subversion
- Godot 4/Unity/Unreal Engine 5

Projects

Gator Hucker **September 2025 - May 2026**

Gator Hucker is a third-person multiplayer arena brawler made in Unreal Engine 5.7. The main components I oversaw were the networking portions of the game and how players could connect across networks using Epic Online Services.

Project Framework: Scrum

Nexus Ninja

September 2024 - December 2024

Nexus Ninja is a 2.5D adventure/fighting game made in Godot. The main components I oversaw were the different enemies and their different actions, the level transition, and sound effects/music implementation.

Project Framework: Scrum

Resume Today

January 2023 - May 2023

This is an online platform designed to simplify the resume-building process for job seekers. The main components I worked on were adding a skills feature in the resume builder, formatting the generated resume, creating content on various pages and creating the logo.
